

LITTLE LEARNERS

RIEKES
EQUIPMENT

**FUTURE FORKLIFT TECHS
ACTIVITY BOOKLET**

WELCOME LITTLE LEARNERS!

Big machines like forklifts help move boxes, food and supplies every day. Forklifts are strong machines that lift and carry heavy things. When a forklift needs help, a forklift technician fixes it.

WHAT DO FORKLIFT TECHNICIANS DO?

Forklift techs make sure these heavy lifting machines work. When forklifts work right, people stay safe. They use tools to:

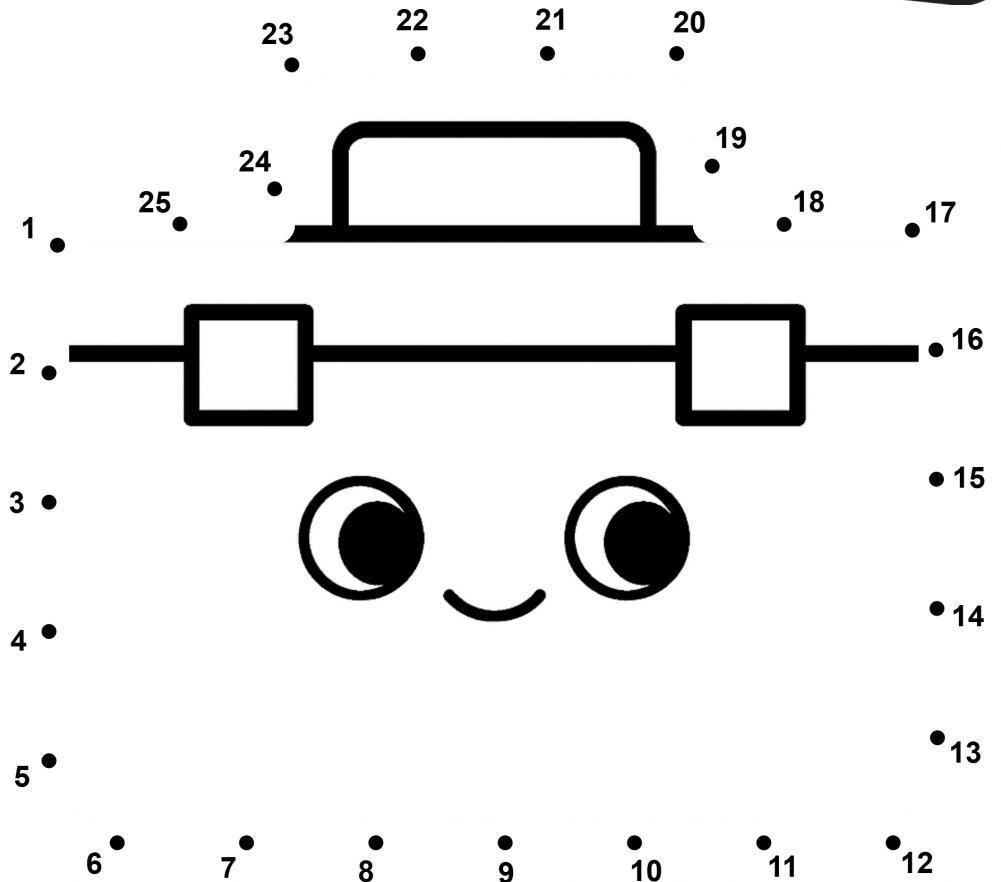

- Check forklifts
- Fix broken parts
- Make machines work like new

What tools do YOU use to fix things?

LET'S CONNECT!

Connect all the dots to see the picture. When you're done, color it in.

Have you seen boxes at the store before?

Someone fixed the forklift that moved them!

EVERYDAY HEROES AT WORK

Forklift techs are problem-solvers. They help others do their work safely every day. Helping, fixing and keeping people safe matters.
